

# HOGERLAND NATIONAL RAILWAYS

## Photo Gallery

Okay, so they aren't really photos. I don't have a digital camera, and photographing and scanning each piece is a pain, so I just put them in my scanner! The hashmarks below the wheels are actually tick marks on a clear plastic ruler. This should give you an idea of the dimensions. The longer tick marks indicate half-inches and inches. You can click on each car or locomotive to see a larger view of the image.

I had already given away a number of pieces before I bought my scanner, so there are some holes in the collection, such as the Christmas tree ornaments for 1997 (several different color schemes for the S1 locomotive). But who knows? Maybe I'll make more copies and they'll appear here later...

I've split the gallery into sections, but there are still a lot of images on each page. They may take a little while to load everything.
